

Inside Out Records

Inside Out Records was born when two people that shared the same vision met in London and dreamed of a label that could actually stand out of the white noise.

The ultimate purpose of the label is not the re-production of good beats but the illustration of dreams, music that whispers to people's souls.

Inside Out Records is a London-based underground label, with the focus of delivering quality underground music by supporting a new force of talented artists and pioneers.

This new label by Alex Zed & Stevie R has evolved out of an increasing need to give birth to new sounds and serve as a large music platform with stable foundations.

The label will promote consistent material through its releases and events that will grow its audience and maintain people as dedicated followers of the label.

The aspects involved (promotion, marketing and event management) will help the label expand to a wider audience.
