**Label:** Steyoyoke Black  
**Format:** Digital  
**Release Date:** October 30th, 2017  
**Cover Art:** BLANCAh

**Cat No:** SYYKBLK030

**Symmetric & Future of Matter** has curated an entrancing and fertile worldview through their ethereal EP entitled **“Enthalpy”**. In their debut release through Steyoyoke Black, Symmetric & Future of Matter injects a level of other-worldly intrigue and nostalgia which creates an intense feeling of unquenchable longing in the listener.

The first track off the EP **“Enthalpy”** provides a graceful point of departure on a mystical journey into the unknown. Despite the slight dissonance and uncertainty present in the tinkering melodies, there is also a sense of reassurance injected by the unfaltering rhythms throughout the song.

The following track, **“West World”**, is more generous with dissonance and unsettling undertones, diving immediately into a less flattering and shiny worldview conveyed with dark and echoey percussion and slithering synths. Still there is a sense of hopeful longing which is left unresolved until the last note.

The third and final track **“West World (Aquiver Remix)”** embodies a more dancefloor sensibility. Rather than dwelling on the intangible peaks and valleys in the original, the remix from the incredibly talented Italian artist, Aquiver, stays decidedly on mid-surface level. The song still has the effect of floating while remaining on a clear and indelible path.

#### TRACKLIST:
