UK based producer **Strinner** does not disappoint with his debut solo release on **Steyoyoke Recordings**. The **Deviation EP** offers three original ethereal techno compositions, all different yet equally matched in quality.

The title track “**Deviation**” gets you moving from the start, yet slowly builds with morphing rhythms and darkly progressing synthesizers. Its spotless production makes it enjoyable to listen through headphones or played out with the bass turned on high. “**Cessation**” bounces and shakes, with steadily pulsing tones and beautiful melodies weaved in throughout. “**Overture**” layers blipping synths with heavier beats but then recedes, and comes back in full force. This driving repeated pattern creates a memorable piece of techno.

All tracks on the **Deviation EP** will undoubtedly make listeners want to dance, yet they do more to intrigue the ear with their fluctuating beats and musical elements. An exciting first release for Strinner in the Steyoyoke family.
